## Education

### KIET GROUP OF INSTITUTIONS

Bachelor of Technology in Information Technology(CGPA of 7.63)

2021 - 2024

DELHI-NCR, India

### Government Polytechnic

Diploma in Information Technology(Percentage of 77.06)

2018 - 2021

Kashipur, India

## Experience

### Devsnest

June 2022 – January 2023

Frontend Developer - Mentor, Contributor

Remote

- Devsnest is an **organization** with over **21k+** community providing **mentorship, guidance, and resources** to students through a peer learning-driven mindset.
- Mentored** and solved Doubts of over **50+** students in the Community.
- Created** over **30+** practice questions for their ongoing **Free Full Stack Developer Bootcamp** on their site **devsnest.in**
- Tested, Debugged, and Revamped code** in each question.
- Write over **50+** **test cases** using **Chai.js, Mocha** and **jest** to test questions.

### Digi-k-labs

Aug 2022 – Oct 2022

Software Developer - Internship

Remote

- Worked** on an **npm package(lightvue)** with over **450+** weekly downloads in **Vue.js**
- Innovated** an **icon picker** component compatible with both **Vue 2.x** and **Vue 3.x**
- Improved** a fully-fledged website for their **form builder tool** used by many users - **formstudio.io**
- Built over **40+** **generic, customizable, props driven** and **fully responsive** components.

## Technical Skills

**Languages:** C/C++, JAVA, Python, HTML5, CSS, SCSS, JavaScript, TypeScript, SQL , object-oriented programming

**Libraries/Frameworks:** React, NextJS, Redux ,Tailwind, AWS, Flask , Node JS, Express, Bootstrap, Jest, Chai, Mocha , RESTful APIs

## Projects

### Postman Clone-API development platform | React,Node.js,Express,MongoDB,Axios,Redux | Link

4

- Designed** and implemented a **web-based application** replicating the functionality of the popular **API development tool Postman**, using React as the primary front-end framework.
- Proposed a user-friendly and intuitive interface** for **composing, testing, and debugging HTTP requests**, incorporating advanced features such as **authentication, environment variables**, and response history.
- Utilized **Redux** for state management, **Axios** for network requests, and local storage for persistence, ensuring a robust and reliable application that enables efficient and **effective API development** workflows.

### BrickBreakers | React,Redux,HTML5 Canvas,Webpack,Babel | Link

4

- Developed a web-based implementation** of the classic arcade game **BrickBreakers using React**, providing an **immersive user experience** through responsive design and **interactive gameplay mechanics**.
- used **React's component-based architecture** and **virtual DOM manipulation** to develop a **zestful and scalable game interface** that allowed for quick **prototyping and iteration** and efficient management of game state.

## Achievements

- Ranked as a **three-star performer on LeetCode**, achieving a maximum rating of **1896**, and recognized as a **"Knight"** on the platform, placing within the top **4.48** of global user.
- Secured a national rank of **2887** out of over **37500** participants in the CodeKaze's largest coding event, demonstrating strong **programming skills** and **proficiency in solving complex problems under time constraints**.
- Achieved a top percentile position, placing **273rd** out of over **24,000** participants in the very difficult Weekly LeetCode Contest 306, displaying a great capacity for problem-solving and ability with **data structures and algorithms**.
- Achieved a top percentile ranking of **1364** out of **27,000+** participants in the highly competitive **Meta Hacker Cup 2022**, showcasing **advanced problem-solving skills** and **expertise in algorithmic programming**.
